8 Fall Table Settings You Can Set in Minutes

Fall is the perfect time to swap out your everyday table settings for pieces with a harvest-inspired mix of color, texture and pattern. Take a look at these eight different table settings you can set in a matter of minutes.

- [ ] Modern Americana - Celebrate the season with an all-American palette of red, white and blue that features a warm, autumnal twist.
- [ ] Elegant Earth Tones - Bring an organic touch to your harvest table by layering pumpkin and mustard tones.
- [ ] Crisp and Clean - Sometimes the less-is-more approach is best. Choose one color and a mix of creamy neutrals, then add a simple, organic accent for a seasonal touch.
- [ ] Traditional With a Twist - Put a modern twist on traditional style with contrasting colors and classic patterns, like large-scale botanicals or florals.
- [ ] Classic Blue and White - One of the most popular year-round color schemes for both decorating and entertaining is blue and white.
- [ ] A Mix of Warm and Cool - Apply creative color contrast to your fall table with a mix of warm and cool hues. To avoid a summery look, stick with faded blues with gray or brown undertones.
- [ ] Neutral Metallic - Play with sheen by layering various metallic hues. While silver and gold tones are timeless and loved by all, shades of champagne and bronze feel a bit more unique.
- [ ] Light and Bright - For an unexpected look this season, go against the grain with non-traditional fall colors.
