Wedding Dress Measurements

Don't forget this list when you head to the tailor!

- [ ] Full Breast - measure breast at the fullest point
- [ ] Waist - measure around the waist at smallest point
- [ ] Hips - measure around hips at the fullest points
- [ ] Upper bust - measure above your breasts in the same manner as you measured across them
- [ ] Under bust - measure under your breasts in the same manner as you measured over them
- [ ] Length of shoulder to bust - measure from the top of your shoulder down to the bust point (or "apex")
- [ ] Front length shoulder to waist - measure from where your shoulder meets your neck straight down over your bust to the true waistline
- [ ] Outer leg length - measure from your true waist to the floor with your intended matched shoes on (This is to ensure the proper height for your wedding day.)
- [ ] Full front length - measure form the hallow of your neck (where it meets the chest) to the floor, again with your intended matched shoes on (This is to ensure the proper height for your wedding day.
- [ ] Across back - on your BACK, measure from the far edge of one shoulder socket (where you feel the shoulder bone protruding), straight across your chest to the same point on your other shoulder
- [ ] Arms eye - get the size of your armhole by simply measuring that of a garment you are comfortable wearing (or has the desired fit). Circle the measure tape all of the way around
- [ ] Sleeve length - Measure from the edge of your shoulder socket straight down to your wrist (through your elbow)
- [ ] Bicep - measure around your arm a the fullest part of your upper arm
- [ ] Upper arm length - measure from the edge of your arm socket straight down to the elbow joint
