How to Accept Mobile Credit Card Payments on Stripe

These days it doesn't matter what or where you sell. You need to accept credit cards or you may be delaying payments and losing out on sales.

1. Download the ChargeStripe app

- [ ] You can get the ChargeStripe app for free from the Apple or Android app store. Install it on your phone, and we'll guide you through the rest.

2. Set up your Stripe account in the ChargeStripe app. You'll need to have the following information ready:

- [ ] Business email address
- [ ] Physical business address
- [ ] Business phone number
- [ ] Social Security Number or Employer Identification Number:
- [ ] Website or social media profile
- [ ] Personal information: Including your name, home address, birthday, and last four digits of your Social Security Number
- [ ] Checking account number and routing number

3. Accept mobile credit card payment on Stripe anywhere, on the go!

- [ ] Swipe with our card reader in person
- [ ] Take an order over the phone, and type in card information
- [ ] Scan a card using your phone's camera.
