Section 4: Special Considerations for Shared Transportation

Agricultural employers can use this checklist to create a COVID-19 assessment and control plan for applying specific preparation, prevention, and management measures. This checklist is based on guidance from the CDC and US DOL (https://bit.ly/covid-ag-cdc-dol). *Disclaimer*: Checklist is for reference only and does not guarantee compliance with state or local regulations.

- [ ] 1. Provide as much space between riders as possible.
- [ ] 2. Group (or cohort) workers in the same crews and/or those sharing living quarters together when transporting.
- [ ] 3. Increase the number of vehicles and/or the frequency of trips.
- [ ] 4. Provide hand washing/sanitizing stations for use before riders enter a vehicle and when arriving at their destination.
- [ ] 5. Train riders to follow coughing and sneezing etiquette.
  https://www.cdc.gov/healthywater/hygiene/etiquette/coughing_sneezing.html
- [ ] 6. Encourage all vehicle occupants to wear cloth face coverings.
  https://www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/diy-cloth-face-coverings.html
- [ ] 7. Clean and disinfect vehicles in accordance with CDC guidelines for non-emergency transport vehicles before and after each trip, or daily at minimum.
