How to add a Google Map to WordPress

If you have your site hosted on WordPress and need to add a Google Map to show your business' locations, there are a few simple ways to do it.

Use a Store Locator/Wordpress Plugin

- [ ] Select a store locator that's compatible with Wordpress, like Storemapper
- [ ] Create an account and log in
- [ ] Install it on your WordPress page
- [ ] Upload your store's locations
- [ ] Customize your map according to your brand's guidelines
- [ ] Save and publish

Embed your map without a WordPress plugin

- [ ] Go to https://www.google.com/maps
- [ ] Log into your Google account
- [ ] Create a map
- [ ] Make your map public
- [ ] Generate an embed code by clicking on "Embed a map"
- [ ] Copy the code
- [ ] Add your Google Map API key (if you have one) to the embed code
- [ ] Log into your Wordpress account

- [ ] Access the WordPress page editor
- [ ] Add the embed code to the Text tab
