# Things to Check Before You Call for an Air Conditioning Repair

Will give you 5 simple tips that will help you internally check if there is a problem in AC, which needs expert intervention or minor leaks that can be rectified at home.

- [ ] Check your thermostat if it is set properly
- [ ] Do you check your disposable air filter from time-to-time?
- [ ] Do you check the equipment door?
- [ ] Check the circuit breaker
- [ ] Check your outside unit- Is it running or not?
