How to add Google Maps to a Squarespace Site

If you have a Squarespace page and want to embed a Google Map on it, the good news is that this is easy with a plugin. Here's how you can add a Google Map to your Squarespace site.

Using Storemapper

- [ ] Sign up for Storemapper
- [ ] Get your embed code at your store's database
- [ ] Go to the admin dashboard
- [ ] Select "pages" and then "add page"
- [ ] Name your new page and click save
- [ ] Go back to the admin page
- [ ] On the navigation menu, select the new page created
- [ ] You will see a black bar. Hover the mouse over it and click on the black insert point
- [ ] When the menu opens, select "Code"
- [ ] Set the source to HTML
- [ ] Paste the copied embed code on the text box and save
- [ ] Save page's changes
- [ ] Click on "View page" to check if the map is rendering correctly

Using an embedded Google Map

- [ ] Create a account via Storemapper and simply embed the code onto your Squarespace site
