

How to add Google Maps to a Squarespace Site

If you have a Squarespace page and want to embed a Google Map on it, the good news is that this is easy with a plugin. Here's how you can add a Google Map to your Squarespace site.

Using Storemapper

- ☐ Sign up for Storemapper
- ☐ Get your embed code at your store's database
- ☐ Go to the admin dashboard
- ☐ Select "pages" and then "add page"
- ☐ Name your new page and click save
- ☐ Go back to the admin page
- ☐ On the navigation menu, select the new page created
- ☐ You will see a black bar. Hover the mouse over it and click on the black insert point
- ☐ When the menu opens, select "Code"
- ☐ Set the source to HTML
- ☐ Paste the copied embed code on the text box and save
- ☐ Save page's changes
- ☐ Click on "View page" to check if the map is rendering correctly

Using an embedded Google Map

- ☐ Create a account via Storemapper and simply embed the code onto your Squarespace site
